APA Style JARS
Journal Article Reporting Standards

A Guide to Thorough and Accurate Research Reporting

What are APA Style Journal Article Reporting Standards (JARS)?

JARS are a set of tables that offer guidance on which information to include in a research paper. The standards are available for quantitative, qualitative, and mixed methods research.

In addition, the **JARS for Race, Ethnicity, and Culture** include best practices for discussing race, ethnicity, and culture within scientific manuscripts in the field of psychology.

Who are JARS for?

JARS can be used by anyone who engages with research.

- **Authors**
- **Editors**
- **Reviewers**
- **Instructors**
- **Students**
- **The community**

Why use JARS?

There are many reasons to use JARS. For example, the standards:

- Promote critical thinking when conducting and writing about science
- Increase research transparency
- Highlight opportunities for collaboration and funding
- Assist with replication for applicable studies
